

# How to convert a cell to a Markdown cell?

## Case 1

The screenshot shows the JupyterLab web interface. The browser address bar indicates the URL is `localhost:8888/lab/tree/Untitled43.ipynb`. The left sidebar contains a file browser with a search bar and a list of files. The main area displays a code cell with the following Python code:

```
[1]: import numpy as np;
import sys;

"""
4
3,2,4,5
4,3,2,3
6
```

A context menu is open over the code cell, showing three options: "Code", "Markdown", and "Raw". The "Markdown" option is highlighted.

Click a cell and choose “Markdown” option under Code.

# How to convert a cell to a Markdown cell?

## Case 2

biglab-5.notebook.ap-northeast-1.sagemaker.aws/notebooks/Untitled2.ipynb?kernel\_name=conda\_python3

jupyter Untitled2 Last Checkpoint: 18 minutes ago (autosaved)

File Edit View Insert Cell Kernel Help

# Using Markdown in Jupyter

The screenshot displays a Jupyter Notebook interface with the following content:

- Text:** Bullets? We can do that:
- List-Group:**
  - At parties
    - Birthday parties
    - Graduation parties
  - At weddings
  - At dance festivals
- Section Header:**

## # Exercise: Try this:
- Code Cell:**

```
1 # Exercise: Try this:
2
3 1. Write a function
4 2. Get the output from the function
5 3. Print th
```

```
In [1]: 1 def hello(name):
        2     return f'Hello, {name}'
        3
        4 hello('world')
```

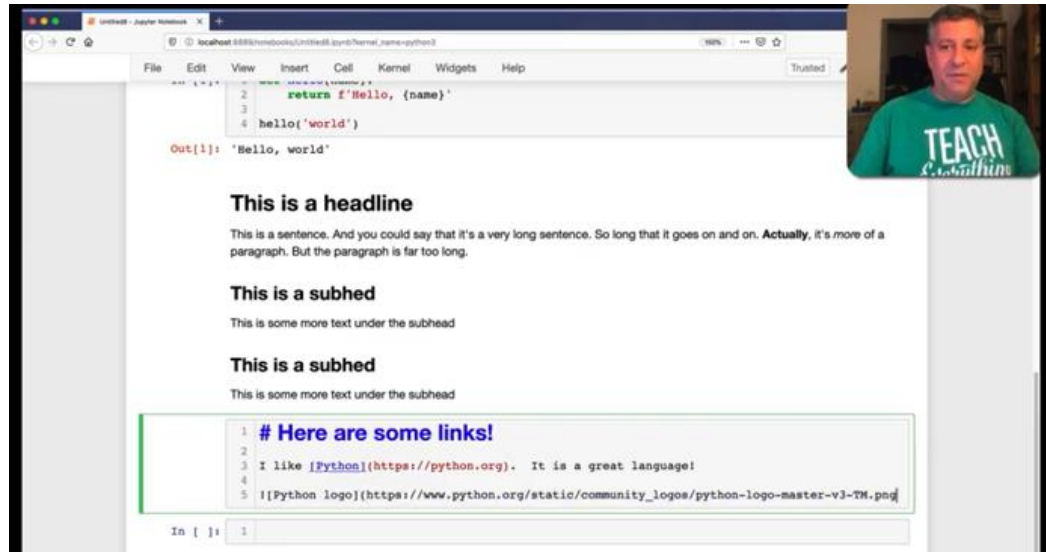

Out[1]: 'Hello, world'
- Section Header:**

## This is a headline
- Text:** This is a sentence. And you could say that it's a very long sentence. So long that it goes on and on. **Actually**, it's more of a paragraph. But the paragraph is far too long.
- Section Header:**

### This is a subhed
- Text:** This is some more text under the subhead

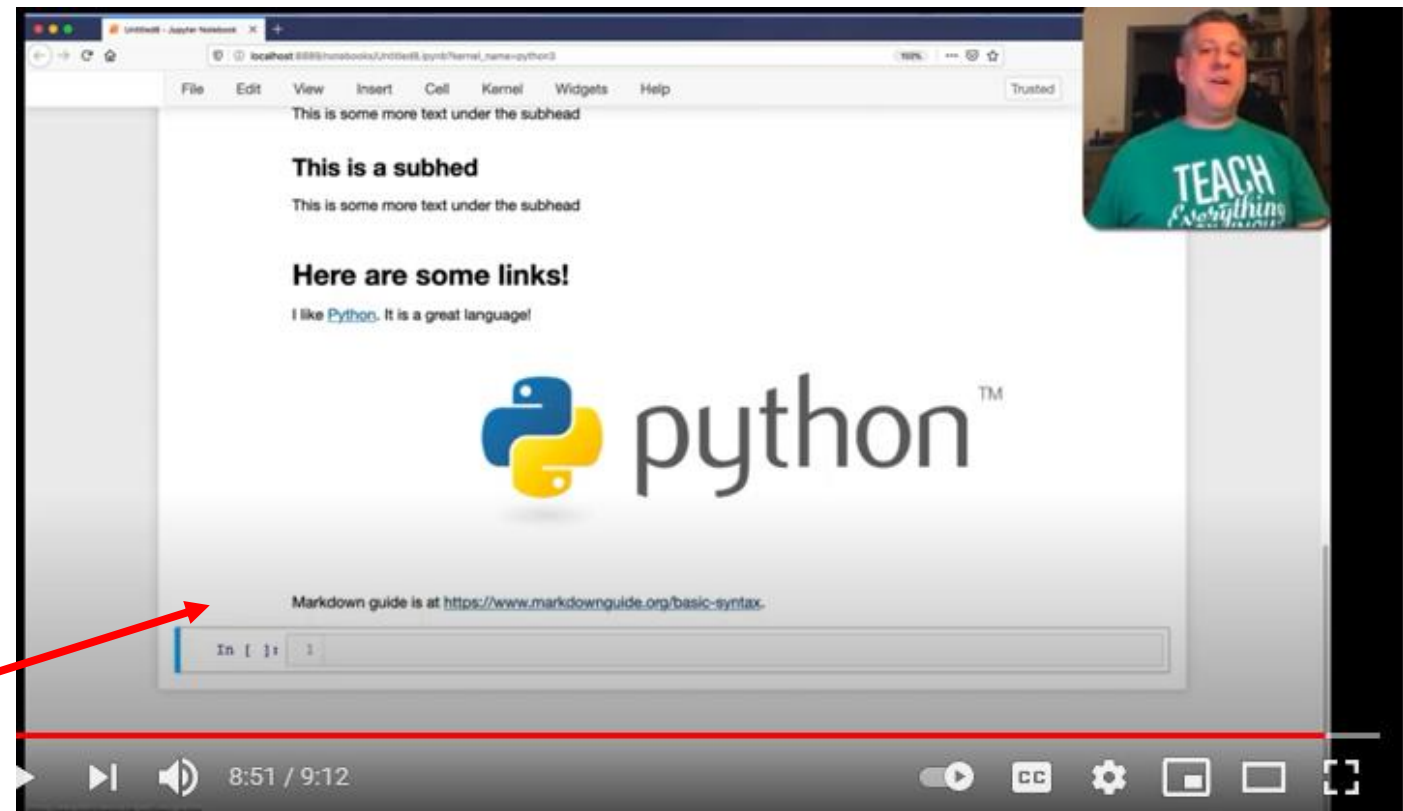

A video player overlay is present in the top right corner, showing a man in a green shirt with the text "TEACH Everything". The video progress bar is at 6:16 / 9:12.

# Using Markdown in Jupyter

You can even add images in markdown cells.
